What We'll Cover Today in 45 Min

0–5 min

AI in Action- inspiredbi.org

All in one place, step-by-step instructions, and video demos.

5–15 min

Agentic AI vs Generative AI

Student interaction or fatigue-reducing co-creator.

15–25 min

Break-Down-Barriers

Purposefully select & build tools that solve real problems.

25–40 min

Build A Co-Creator

Hands-on with newest AI tools in a FERPA/COPPA platform.

40–42 min

Q&A + Your Blueprint

Leave with a concrete action plan for your classroom

The Real Problem in the Classroom

**50.3
HOURS**

Average teacher workweek

43%

Time spent actively teaching
(DfE Workload Survey, 2024)

You are **exhausted** because you are doing the **heavy lifting of logistics**, not just the heavy lifting of teaching.

AI IN ACTION

What's Possible?

My AI-Built Website

Fully designed & deployed — no coding required. Your digital presence, handled.

AI Agent Scheduling

AI reviewed, scored & improved tiered scheduling in minutes, not hours.

AI Making Time for Connections

AI-generated highlight reel of my achievements, ready to share & celebrate.

Why AI?

I Choose to Know Not to Fear

1. Academic Integrity & "The Shortcut"

2. Bias, Ethics, and Equity

3. Data Privacy and Security

4. Role Displacement & Devaluation

5. The "Time Tax" of Learning

6. Erosion of Human Connection

The Status Quo: A Severe Deficit in Collaborative Planning

High-achieving school systems dedicate up to **35%** of teachers' time to working in teams. **Reclaiming this time requires hacking the master schedule.**

AI serves as a thought partner to engineer the master schedule.

Prompt Funnel

1. Vision & Principles

Generate **non-negotiable scheduling principles** based on protecting PLC time and expanding access.

2. Constraint Surface

Act as a **schedule auditor** to identify hard/flexible constraints based on FTE, facilities, and required minutes.

3. Model Exploration

Propose **3 different models** (e.g., 7-period, A/B block) and analyze tradeoffs.

4. Bell & Sectioning

Translate vision into a bell schedule; determine optimal class sizes and flag inefficiencies.

5. Conflict & PLC Check

Detect student course conflicts and ensure fragile adult learning time is protected.

6. Stress-Testing

Test schedule against mid-year enrollment spikes or sudden teacher vacancies.

Warning: Do not ask AI to "make the schedule." Use layered, purpose-driven prompts to clarify do tradeoffs and pressure-test assumptions.

Feared Competitor → Fatigue-Reducing Co-Creator

AI COMPETITOR

- ✗ Replaces our jobs
- ✗ Students cheat with it
- ✗ Too complicated to use regularly
- ✗ Another thing to manage
- ✗ Impersonal & robotic

AI CO-CREATOR

- ✓ Handles the grunt work
- ✓ Frees you for human connection
- ✓ Learns YOUR classroom style
- ✓ Runs while you sleep
- ✓ Personalizes for every student

ETHICS Framework

Copyright Dr. Maggie Mosher 2025

E

Evaluate & Validate

Critically assess AI outputs, data sources, and the AI tools you choose to use.

T

Tool Application

When effectively implemented, ask: is it best for the job, or is human interaction better?

H

Human & Societal Impact

Consider the ethical and social effects of AI on people and communities.

I

Inner Workings & Fundamentals

Understand the foundational concepts of AI, such as how Large Language Models (LLMs) function.

C

Context & Governance

Maintain awareness of AI policy, accountability, and the context in which it is used.

S

Safety & Fairness

Ensure AI is responsible, respectful, and accessible for all.

AI

- Speed & Data processing

- Infinite patience

- Scaffolding early drafts

- Personalization at scale

The Sweet Spot

My Extended Brain

Humans using AI to extend capability, not outsource thinking.

EDUCATOR

- Embodied experience & empathy

- Lived experiences, insight, and perspective

- Moral judgment

- Productive Struggle (The “stuckness” where learning happens)

What AI Can Do For You — Starting Today

Draft parent & admin emails

Saves 45 min/week

Merge & organize schedules

Saves 2 hrs/month

Lesson plan generation

Saves 3 hrs/week

Progress report drafts

Saves 4 hrs/semester

Differentiated materials

Saves 2 hrs/week

Formative feedback

Saves 5 hrs/week

Step 3: Mechanical Differentiation at Scale

The Break-Down-Barriers Approach

Purposefully Selecting & Building AI Tools That Solve Real Classroom Problems

1

IDENTIFY

Name your #1 time-drain.

Be specific, not 'planning' but 'writing 30 differentiated exit tickets every Friday'.

2

EVALUATE

Is this repetitive or follow a pattern? Could another do it from my notes? If yes → AI candidate.

3

SELECT

Match the barrier to the right AI tool type: generative (creates content) vs agentic (takes action). Don't over-engineer.

4

BUILD

Start with one prompt, one tool, one use case.

Iterate weekly. Your AI gets smarter as you refine it together.

Optimizing AI Models

Pruning &
Distillation
(LoRA)

Low-Rank
Adaptation

Determining Best for Task

Data Center &
Infrastructure

Protocols

Open-Weight
Models

Hardware & Energy Efficiency

Eco-Cooling

Efficient
Hardware

Carbon-Aware
Scheduling

Industry-Wide Initiatives

Eco-Coolon
Scheouling

Transparency
& Reporting

Sustainability
Culture

FERPA & COPPA Compliant AI — Non-Negotiable

FERPA

Family Educational Rights &
Privacy Act

Student education records can't be fed into public AI tools without consent. Use only district-approved or on-premise AI platforms.

COPPA

Children's Online Privacy
Protection Act

Students under 13 require special protections. AI tools collecting student data must have verifiable parental consent & data minimization.

The good news: compliant AI platforms exist and we'll build on them today.

Collaborate Seamlessly — Even Without Common Plan Time

Shared AI-generated curriculum banks: one teacher prompts, everyone benefits

Asynchronous feedback loops: AI drafts, you review, colleague refines

Standardized prompt libraries your whole team uses: improve together

AI meeting notes & action item trackers: no post-meeting follow-up chaos

Personalized Learning for Every Student — Without Burnout

ELL

AI translates materials,
creates bilingual scaffolds &
vocabulary support

IEP / 504

Differentiates reading levels,
formats text for accessibility,
modifies assessments

Gifted

Generates extension
projects, higher-order
questions & personal paths

At-Risk or Struggling

Creates graphic organizers,
audio versions & simplified
summaries instantly

Absent

Produces catch-up packets,
summarize missed
instruction & check-ins

Every Student

Formative feedback loops,
personalized practice sets &
progress tracking

Leave Today With a Concrete Action Plan

This Week

Name your #1 time-drain. Try ONE AI option to address it.

Next Week

Share your prompt/idea/agent/chatbot/flow with one colleague. Refine it together.

This Month

Build a library of options for your most repetitive tasks or greatest student needs.

This Semester

Implement one agentic workflow or student chatbot. Automate something you do every week.

Mapping the continuum of artificial intelligence autonomy.

You Already Have What It Takes.

AI gives you the bandwidth to prove it — every day.
